## GO-GLOBAL FOR UNIX

FAST AND SECURE ACCESS TO UNIX AND LINUX APPLICATIONS FROM ANYWHERE

GO-Global® for UNIX from GraphOn® is the fast and secure application access solution that extends the reach of your existing UNIX and Linux applications to your corporate network or the Web – without the need for local X server software. Now you can instantly make your applications accessible to local and remote users, while retaining all of your application's features, functionality and branding. All without touching a single line of code.

Using a browser plug-in or a tiny native client, you can run your heavy-duty UNIX applications on any network-attached device, regardless of platform or operating system. GO-Global for UNIX lowers your TCO by eliminating the need for cumbersome local X server software, while maximizing your existing investments in UNIX and Linux applications. With our near zero-footprint clients, only the application's interface is delivered across the network and displayed on the remote devices, resulting in unmatched speed and performance.

### GO-GLOBAL FOR UNIX AT A GLANCE

- Provides instant, cross-platform access to UNIX and Linux applications from local and remote devices, while retaining 100% of the application's features, functions, and branding
- Eliminates the need for local X server software
- Maximizes investments in existing UNIX and Linux applications, eliminating the need for rewrites, add-ons, or extensions
- Publishes or Web-enables applications or the entire desktop
- Reduces costs, improves security, and simplifies licensing management

### PRODUCT FEATURES

- Advanced, server-centric solution with near zero-footprint clients
- High-performance, patented RXP protocol over low-bandwidth connections
- Strong authentication and security, including proxy tunneling and encryption (56-bit DES standard, 256-bit AES optional)
- Complete cross-platform compatibility
- Session reconnect
- 24-bit color support
- Client printing and file transfer
- XML-based sharable database
- Support for PAM modules
- Highly scalable solution

## PROVIDING GLOBAL APPLICATIONS ACCESS

GO-Global for UNIX supports a wide range of user devices, such as heterogeneous desktops (Windows, Linux, etc.) and Web browsers. So now your local and remote users can painlessly and cost-effectively access your UNIX and Linux applications.

## LOWERING COSTS AND SIMPLIFYING MANAGEMENT

Deploying, maintaining, and managing X server-based applications can be very costly and time-consuming. And the high bandwidth requirements dictate a LAN connection. With GO-Global's simplified, near zero-footprint clients and high-performance RXP protocol, you save time, money, and scarce IT resources.

## MAXIMIZING THE VALUE OF YOUR INVESTMENTS

GO-Global maximizes the value of your organization's current investments in UNIX and Linux applications. The net result is faster ROI. For example, now you can run UNIX applications such as Cadence or AutoCad on your Windows or Linux desktops, allowing your employees to be more productive in the office or on the road.

## INCREASING EFFICIENCY

GO-Global greatly increases your organization's operational efficiency. You'll benefit from highly scalable, centralized application deployment, the ability to leverage corporate networks and the Web, and easy cross-platform access. You'll be able to reduce operating costs, lower bandwidth consumption, and eliminate retraining and re-engineering costs.

## THE SECURE SOLUTION

Unlike distributed applications, with GO-Global's unique architecture your applications and mission-critical data remain secure on the server behind your corporate firewall. Only the application's user interface is transmitted to your remote devices. And all GO-Global transmissions can be fully encrypted (56-bit DES standard, 256-bit AES optional).

## THE ZERO-FOOTPRINT CLIENT

GO-Global for UNIX provides a range of advanced, near zero-footprint clients. You simply use a browser plug-in or a tiny native client to run your heavy-duty UNIX applications on any network-attached device, regardless of platform or operating system.

## THE GO-GLOBAL FAMILY

GO-Global for UNIX is part of GraphOn's application access family that also includes GO-Global for Windows. The GO-Global family makes it a snap to publish or Web-enable UNIX, Linux, and Windows applications for secure, cross-platform deployment to local and remote users everywhere.

## SYSTEM REQUIREMENTS

### GO-Global Server (Host)

- Solaris 10 and 11 for SPARC and x86\_64
- HP-UX 11.x for PA-RISC
- HP-UX 11.23 and 11.31 for ia64
- AIX 5.x for PPC
- Red Hat Enterprise Linux v5.x and v6.x for x86 and x86\_64
- SUSE Linux Enterprise Server v10.x for x86, x86\_64 and ia64
- SUSE Linux Enterprise Server v11 SP2 for x86, x86\_64 and ia64

### GO-Global Clients

- Native X11 client for Red Hat Enterprise Linux v5.x and v6.x for x86 and x86\_64
- Native Windows client - Windows XP, Windows 2000, Windows Vista, Windows Server 2003, Windows Server 2008, Windows 7 and Windows 8
- Firefox 10.0 or later plug-in for Windows XP, Windows 2000, Windows Vista, Windows Server 2003, Windows Server 2008, Windows 7 and Windows 8
- ActiveX Control for Internet Explorer 6.0 or later
